 Press release, Gyldendal Publishing House, Denmark: Apple tightens the screw: Hippie books removed from the App-Store

Apple are escalating it's censorship of Danish author Peter Ovig Knudsen's two hippie books by removing the App editions from it's App Store. The decision was announced via telephony from Apple's headquarters in California. "This latest step by the Apple Corporation is even more alarming than Apple's first act of censorship. Until now it has been possible to purchase the e-books elsewhere on the Internet, but the App-edition, made solely for iPad and Iphone can only be bought through the Apple Store, and it is therefore no longer possible for us to sell the most advanced edition of my book", says Peter Ovig Knudsen

The App-edition of the Hippie books combines an e-book edition containing text and photos with a Audio book including the author reading his work and newly composed music by Tomrer-Claus (Carpenter Claus) one of the main protagonists of the book. The App edition is a special edition developed by The Hippie Company, which gives the user a choice of combining reading with listening to the Audio book and music. It is, to our knowledge, the first of its kind worldwide.

The app edition of Hippie 1 was released simultaneously with the paper edition October last year and was back then approved by Apple. As such it has been available for more than a year through the App Store. The App edition of Hippie 2 was also at first approved and has been in the App Store for more than two weeks.

"Apple's decision was communicated to us by an Apple employee who was not very forthcoming and gave standard answers to my objections. The consequences for us are significant. We have spend a lot resources and considerable amounts of money in developing this App, which is now of no use to us. Even if we self censor it is unlikely that it will be approved for sale by Apple, says Jens Lauridsen, CEO of the Hippie Company.

Last week, after Apple had at first rejected the books on grounds of showing photos of naked people, an edition of the Hippie e-books where nudity was concealed using apples was approved. Four days later the books were however removed from the site by Apple with no further explanation.

The developments have caused considerable debate. Several political spokespersons have raised the matter in the Danish Parliament and Danish members of the EU Parliament have complained to the European Commission. Danish Culture Secretary, Uffe Elbaek, has promised to contact his colleagues in Europe to establish a European common ground on the matter of Apple censorship.

"This is a matter of great principal significance" states Peter Ovig Knudsen " The pattern for how we deal with the use of digital cultural content is being established here and now, and suddenly we have to consider whether big foreign and multinational corporations will censor content, or simply reject selling work, written in Danish for a Danish audience".

The Hippie Company is founded with the purpose of publishing the digital editions of the Hippie Books and is owned by Peter Ovig Knudsen, Gyldendal and the e-company Empatii.

Excerpts from the Hippie-Apps:

Jeppe Lajer, reader reviewer, Hippie App 2: "The Ipad App for Hippie 2 is just as good as number 1 with Tomrer Claus fascinating soundtrack and the exiting choice of shifting between Audio book and e-book - which has made my bicycle rides A LOT better, while at the same time I can continue reading when that suits the social surroundings I am in "

Nina Maria Mørk, reader reviewer, Hippie App 1: "Peter Ovig and i have established a very intimate relationship over the last four days. We have been cuddled ud on my sofa, have been peeling potatoes, making supper and even bin in the hot tub together. The thing is that I have been reading Hippie 1 on my Ipad, which makes it possible for me to shift between reading and listening. This has made it possible for me to bring the stories of Tomrer-Claus, Henning Prins, The-Dan and the so far very unappealing Peter Louis-Jensen with me where ever I go."

 Endnu en forfatter, Michael Næsted Nielsen, har fået fjernet en bog fra Apples iBookstore på grund af "upassende" nøgenhed. Læs mere her:

 Det er jo kun reklame  
 De glemmer at sige i Tv at på facebook er der da masser af porno profiler og billeder.  
 Så det du hører i Tv handler kun om reklame til at sælge hans kedelige bog

 Hvad er der for dærvende eller upassende i disse billeder? Vi bombarderes med dårligt skjulte seksuelle undertoner og afklædte mennesker dagligt i medierne. Skal vi så ikke også få aftenkaffen i den gale hals når vi ser "actionfilm" hvor zoner afstumpet væd og overgreb foregår for åben skærm? Skal vi censurere billederne fra forskellige krigsbøger, hvor lemlæstede. Spar mig vis at høre om overfald, gruppevoldtægt og daglige dødsrig forsendt midt i "den bedste sendetid". Spør mig for at høre om overfald, gruppevoldtægt og daglige dødsrig. Jeg vil ikke kendes ved det - men det foregår alligevel lige for øjnene af mig, uanset om jeg vil det eller ej. I dag kan et billede af et nøgent menneske næppe vække den samme forargelse og provokation som i 70. erne. Men billedet af en kvinde med hår på dåsen - det er for klamt, synes glatfisserne. Det handler om holdninger - intet andet.
